CvtRPGIV

Templates and Instructional Book

Make things easier and learn something new . . . convert to RPGIV! Do it with our conversion tool and experience the power of RPGIV. Convert all RPGII and RPGIII source to RPG IV syntax and experience the flexibility of the language's newest capabilities. CvtRPGIV makes the move to RPGIV simple for AS/400 shops and picks up where IBM'S CVTRPGSRC leaves off. RPGIV Program Templates are included to aid in the learning process!

DBUnifier

Interactive database applications in minutes!

Eliminate your mundane tasks. Put them in the Hands of your power users! DBUnifier creates interactive applications for database information instantly. Use DBUnifier to view and maintain information from database files. To create a DBUnifier application, follow a sequence of displays that guide you through the process of defining and saving an application. In minutes the definition is complete and users can execute your database application!
